Royal Woodworking PRODUCT CATALOGUE

royalwoodworking.com

COMPANY

Royal Woodworking has been a manufacturer and distributor of solid wood products since 1976, providing quality products throughout North America. Located in Bradford, Ontario, Royal Woodworking is an upscale addition to Alexandria Moulding’s wide array of products.

Royal Woodworking has an extensive line of in stock mouldings, boards, and stair parts. Additionally, we offer custom manufacturing and a large variety of specialty items, including: custom curves, flexible moulding, wood columns, post covers, prefinished or primed mouldings, and thresholds.

Royal Woodworking uses in-house lumber sourcing to assure consistency and variety in our high-quality products. We offer many types of hardwoods and softwoods, including but not limited to: Poplar, Maple, Walnut, Cherry, Red Oak, White Oak, douglas Fir, Hemlock and White Pine.

Royal Woodworking specializes in manufacturing custom millwork for both residential and commercial projects. We have thousands of custom profiles to choose from in our library. Royal Woodworking also has the ability to create knives to match unique specifications or duplicate turn of the century profiles in our on-site toolroom.

Royal Woodworking shares the Alexandria Moulding commitment to serve our customers flexibly with cost-effective, quality mouldings, on time with a 100% fill rate. We continuously strive to be the best in class at developing and bringing to market value-add products and services.

CUSTOM MILLWORK

CUSTOM MILLWORK CAPABILITIES

In addition to our extensive line of in stock profiles and species, we offer custom options that will match any request. Whether it is a historical profile, a designer's creation or a profile engineered for a specific application, Royal Woodworking can match any specifications.

Custom Profiles

We maintain a tooling library with thousands of profiles and may already have the tooling required for your custom profile. If we do not have the profile you need, we can design and create custom knives in-house to ensure a perfect match.

Lumber Species

Royal Woodworking warehouses an inventory with dozens of lumber species in various thicknesses, but if you are looking for something unusual, our team can source the hardwood or softwood species you require.

Edge and Face Gluing

If the species you want is not available to make the width or thickness you need, then Royal Woodworking can edge or face glue lumber together to create the blanks required. This makes profiles such as tall baseboards and thick handrails possible even if the sizes of rough lumber are limited.

Additional Services

Royal Woodworking is capable of much more. We offer several other in-house services such as priming, CNC milling, curved mouldings, and custom end work. Beyond that, we work with a network of suppliers to offer turning, pre-finishing and other specialty services.

Think Royal Woodworking when your project requires custom wood mouldings or specialty wood products.

CUSTOM CURVES

Custom Curves made to fit unique window shapes and sizes.

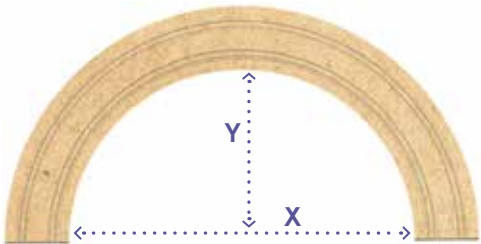

Available Species

Available Shapes

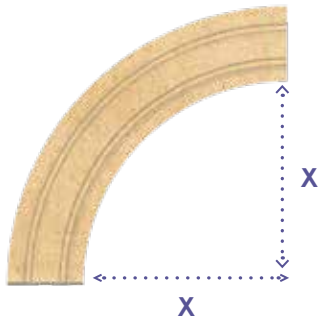

Dimensions Required

Half Circle
(or Full Circle)

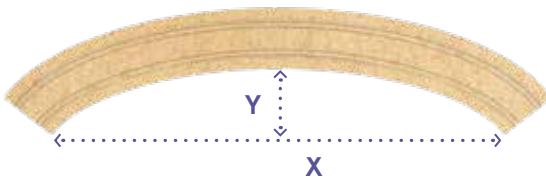

X (Diameter)
Y (Radius)
Reveal: included or not
Note: X should be 2 times Y
Otherwise you may not have a half circle or full circle

Quarter Circle

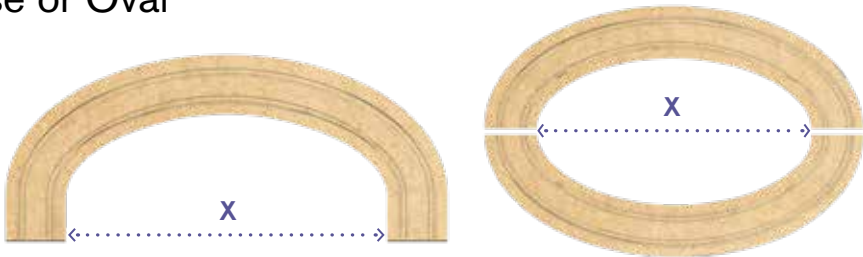

X (Radius)
Reveal: included or not
Note: X should be the same both places otherwise you may not have a quarter circle

Eyebrow

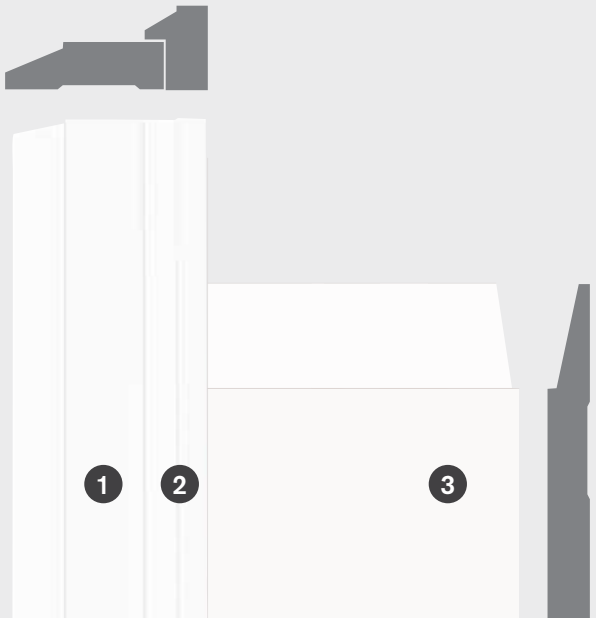

X (Width)
Y (Height)
Reveal: included or not

Ellipse or Oval

X (Width)
Template Required
Reveal: included or not

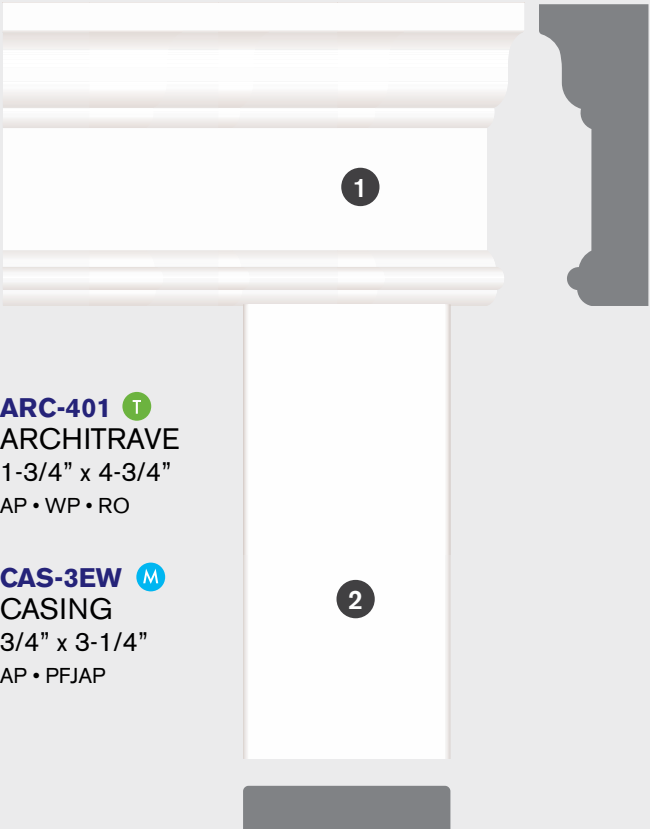

Note: The reveal is the amount of "jamb" that can be seen once the moulding is in place. A standard reveal is 3/16".

WALL TREATMENT

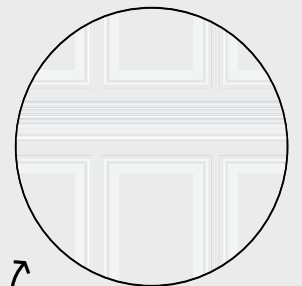

A modern interior space featuring dark wood vertical slat wall treatment. A window is framed by a white border and covered with a brown woven blind. A wooden bench with a white cushion and a black and white patterned pillow sits in front of the wall. A circular inset shows a close-up of the wall treatment and a plant.

The diagram shows a three-part assembly. Part 1 is a dark grey L-shaped bracket at the top left. Part 2 is a dark grey vertical support piece. Part 3 is a large, light grey rectangular panel. The assembly is shown in a perspective view, with the panel being the main body and the bracket and support piece being accessories.

CROWN PROJECTIONS

The following table displays all crown, cove and bed mould profiles offered in the product catalogue.

The table indicates the swing angle, the wall coverage, and the ceiling coverage of the crown.

As wall/ceiling angles and installation angles may vary, these values are to be used as approximations only.
